Subject: Exide Cleanup Soil Disposal

Tom,

The residential cleanup soils are disposed of at Republic Services in La Paz, Arizona, which is about 20-30 miles from Parker (but not on CRIT land). Non-haz waste is sent to Chiquita Landfill just north of LA. I looked up the Republic Services area using EJ Screen and upon first glance it does not seem like there are any major EJ concerns:

Subject: RE: USEPA Comments - Exide Draft Closure Plan

Hi Nathan,

We perform a waste profile for each of the residential properties that is undergoing cleanup. If the soil **is** a **CA Hazardous Waste** then the soil is shipped to Republic Services (La Paz, Arizona). If the soil show that the soil **is not** a CA hazardous waste, then it is sent to Chiquita Landfill as daily cover.

Pete

Hi Nathan, I'm not sure if that is developed yet for future residential cleanups. I'm hoping Su, Sarah or Pete (cc'd) can help answer your question.

Hi Wayne,

Quick question unrelated to the closure plan – Do you where the lead-contaminated soil from residential cleanups around Exide will be disposed of?

Thanks,

Nathan

Subject: USEPA Comments - Exide Draft Closure Plan

Wayne,

Thanks again for providing EPA this opportunity to review and provide input on the Draft Exide Closure Plan. Please find attached our transmittal letter and comments on the closure plan. We can schedule another call if you would like to discuss further.

Thanks,

Nathan
